EDUCATION

Indian Institute of Technology Roorkee <i>B.Tech. in Electrical Engineering (CGPA: 8.15)</i>	Roorkee, India 2023 – Present
D.A.V Public School, Patna (CBSE) <i>Intermediate (Class XII) – 95.80%</i>	Patna, India 2022
D.A.V Public School, Patna (CBSE) <i>Matriculate (Class X) – 97.40%</i>	Patna, India 2020

EXPERIENCE

Accenture <i>Software Engineering Intern</i>	May 2026 – Jul 2026 Bengaluru, India
– Reduced manual PMO effort by automating resource tracking, allocation, and escalation workflows end-to-end. – Incorporated authentication, agents integration with multi-portal UI replacing manual spreadsheet tracking – Also developed a Custom Multi-Lingual translator from scratch with dictionaries containing 34000+ words.	

PROJECTS

AI-Driven Cyberattack Detection for SRF-PLL Systems <i>Python, FastAPI, Docker, OpenEnv</i>	
– Built an OpenEnv-based cyber-physical security framework for detecting and classifying False Data Injection (FDI) attacks on SRF-PLL controlled grid-connected inverters. – Combined physics-informed anomaly detection, heuristic reasoning, and LLM (Qwen) assisted decision making. – Evaluated attack detection across sinusoidal, ramp, pulse, and stealthy attack scenarios, achieving 99.0% detection score and 87.2% multi-attack classification score. Code: Github Repo	
Credit Card Default Prediction <i>LightGBM, SMOTE</i>	May 2025 – Jun 2025
– Built a credit risk classification model optimizing F2-score for high-recall decisions. – Handled class imbalance using SMOTE and achieved F2-score of 0.60 with tuned LightGBM. Code: Github Repo	
Smart Vision Quality Control System <i>Computer Vision, LLM Pipelines</i>	Oct 2024 – Dec 2024
– Developed an AI-based computer vision system for automated product classification and defect detection.	
Text-to-Image Generation <i>Stable Diffusion, Hugging Face, Docker</i>	May 2024 – Jun 2024
– Developed a modular, local-inference pipeline using fine-tuned Stable Diffusion v1.5 and Hugging Face Diffusers. – Built an interactive Streamlit dashboard and containerized the setup using Docker for reproducible deployment across different environments. Code: Github Repo	

PUBLICATIONS

Fast Diffusion with Physics-Correction for ACOPF <i>Diffusion Models</i>	Accepted at IEEE SEFET 2026
– Co-authored a physics-guided diffusion framework using DDIM for scalable ACOPF synthetic data generation. – Designed constrained sampling with gradient-based physical corrections, enabling generation of physically consistent operating points. – Achieved up to 20× faster inference compared to standard DDPM diffusion while preserving statistical fidelity across IEEE 6-, 24-, and 118-bus systems. Implementation released at: GitHub Repository. Preprint: arXiv.	

AWARDS & ACHIEVEMENTS

Ranked 4th in Flipkart Grid 6.0 (Team Event)

East Zone Rank 4 in IQ Challenge (Kshitij 2022, IIT Kharagpur)

AIR 18 in Technothlon'19 (Juniors)

Global Rank 801 in Codeforces Round 1032 Div 3

TECHNICAL SKILLS

Languages: C++, Python, MySQL

Tools: VS Code, Google Colab, Kaggle, Hugging Face, Roboflow, Git, GitHub

Courses: Supervised Machine Learning, Generative Adversarial Networks (Coursera)

POSITIONS OF RESPONSIBILITY

Member

Mar 2024 – Present

Models and Robotics Section (MaRS), IIT Roorkee

- Worked on AI/ML robotics projects and contributed to model deployment and testing.
- Participated in Flipkart Grid 6.0 and Srishti 2025 (1st position).

Deputy Cell Secretary

Jul 2024 – Present

Marketing & Promotions Cell, NSS IIT Roorkee

- Managed outreach campaigns and promoted events across campus and social platforms.

Competitive Programming

Dec 2023 – Present

Online Judges

- Codeforces Specialist (max rating 1532), solved 800+ problems across major DSA topics.
